KEY ADDITIONAL INSIGHTS (Formulas-Based)

1. Mumbai dominates the premium real estate market and is costiest city in the dataset.

2. These cities provide comparatively affordable property option.

3. Apatment-based housing dominates the market inventory.

4. More than half of the properties are still available.

5. Mumbai not only has the highest property prices but also strong Investment returns.

6. ROI differences between cities are small, but Mumbai performs best overall.

7. Properties typically remain listed for nearly 6 months before sale/rent.

8. Demand differs significantly by district.

9. Gated Community properties are priced higher than non-gated properties.

Overall Consulsion

The real estate market is dominated by apartment properties and high inventory availability. Mumbai leads in both average property price and ROI, making it the strongest premium investment market. Chennai and Hyderabad provide more affordable alternatives. Gated communities command higher prices due to better amenities and security, while property demand and market activity vary significantly across districts.
